DELTA²⁰⁰⁰
ARCHITECTURAL SOLUTIONS FOR CLEAN ROOMS

QUALITY IS THE FOUNDATION
OF EFFICIENCY

Delta 2000 was founded through the merging of two companies, which had been serving the market for over twenty years, and it is now a worldwide leading company in the design and production of solutions for clean rooms and controlled-contamination environments.

The know-how and organization of the two companies allowed us to become a reliable partner for all companies that need innovative design, quality products and advanced services.

We are structured and organized to operate in the following sectors: pharmaceutical, chemical, medical, electronics, food, cosmetics and architecture.

We offer to our customers a real partnership: besides a high-quality product, we provide pre- and post-sales services.

Our flexibility and innovation-proneness have enabled us to face successfully the demands of different market sectors and to produce state-of-art solutions with steadily improving **quality.**

“Striving for Quality is the prerequisite for successful product differentiation, but it also becomes a fundamental principle, because Quality companies attract Quality people”.

WE DREAM OF A TOTALLY
UNCONTAMINATED WORLD

We want to be responsible not only for our success, but mostly for the other's well-being, by providing technical advice that improves the life quality and comfort. Product quality also depends on the raw materials purchased from our suppliers, which are carefully chosen among the best to achieve unique results.

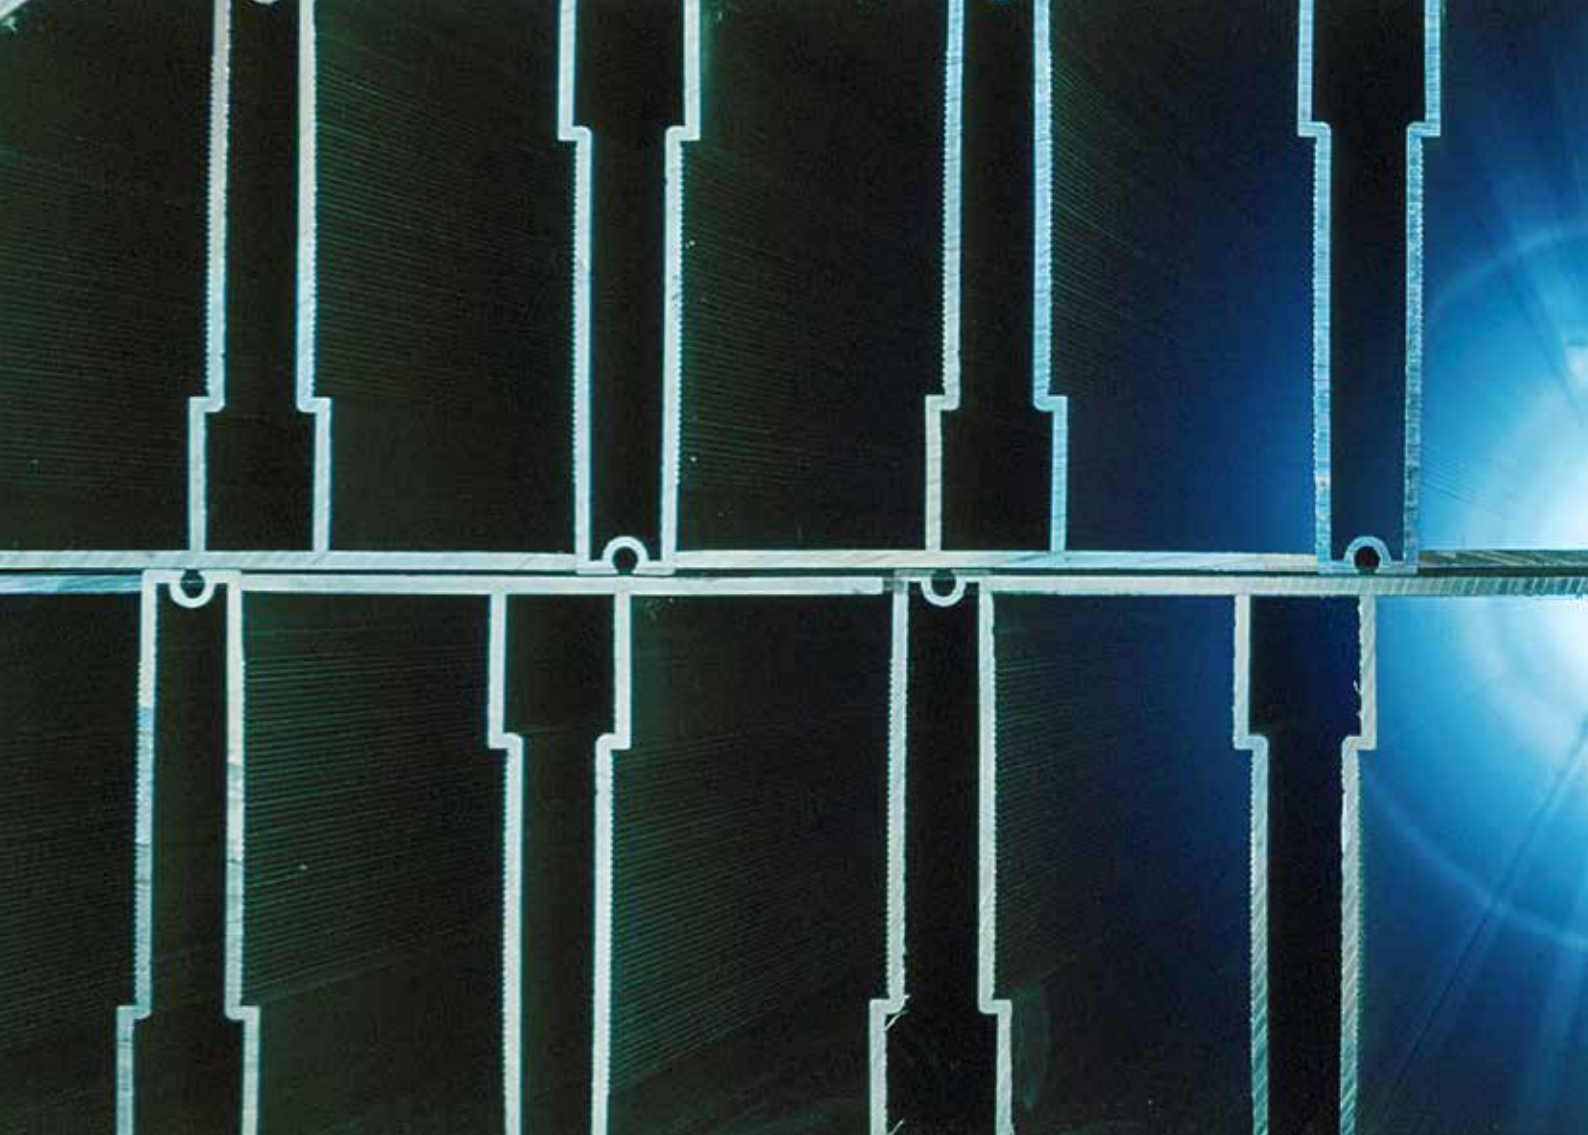

We wish to be transparent both to our customers and towards our suppliers, for a confidence in reliability and with the confidence of being able to deal with all the problems that may arise.

We are aware that our international success is based on the deep knowledge of local markets.

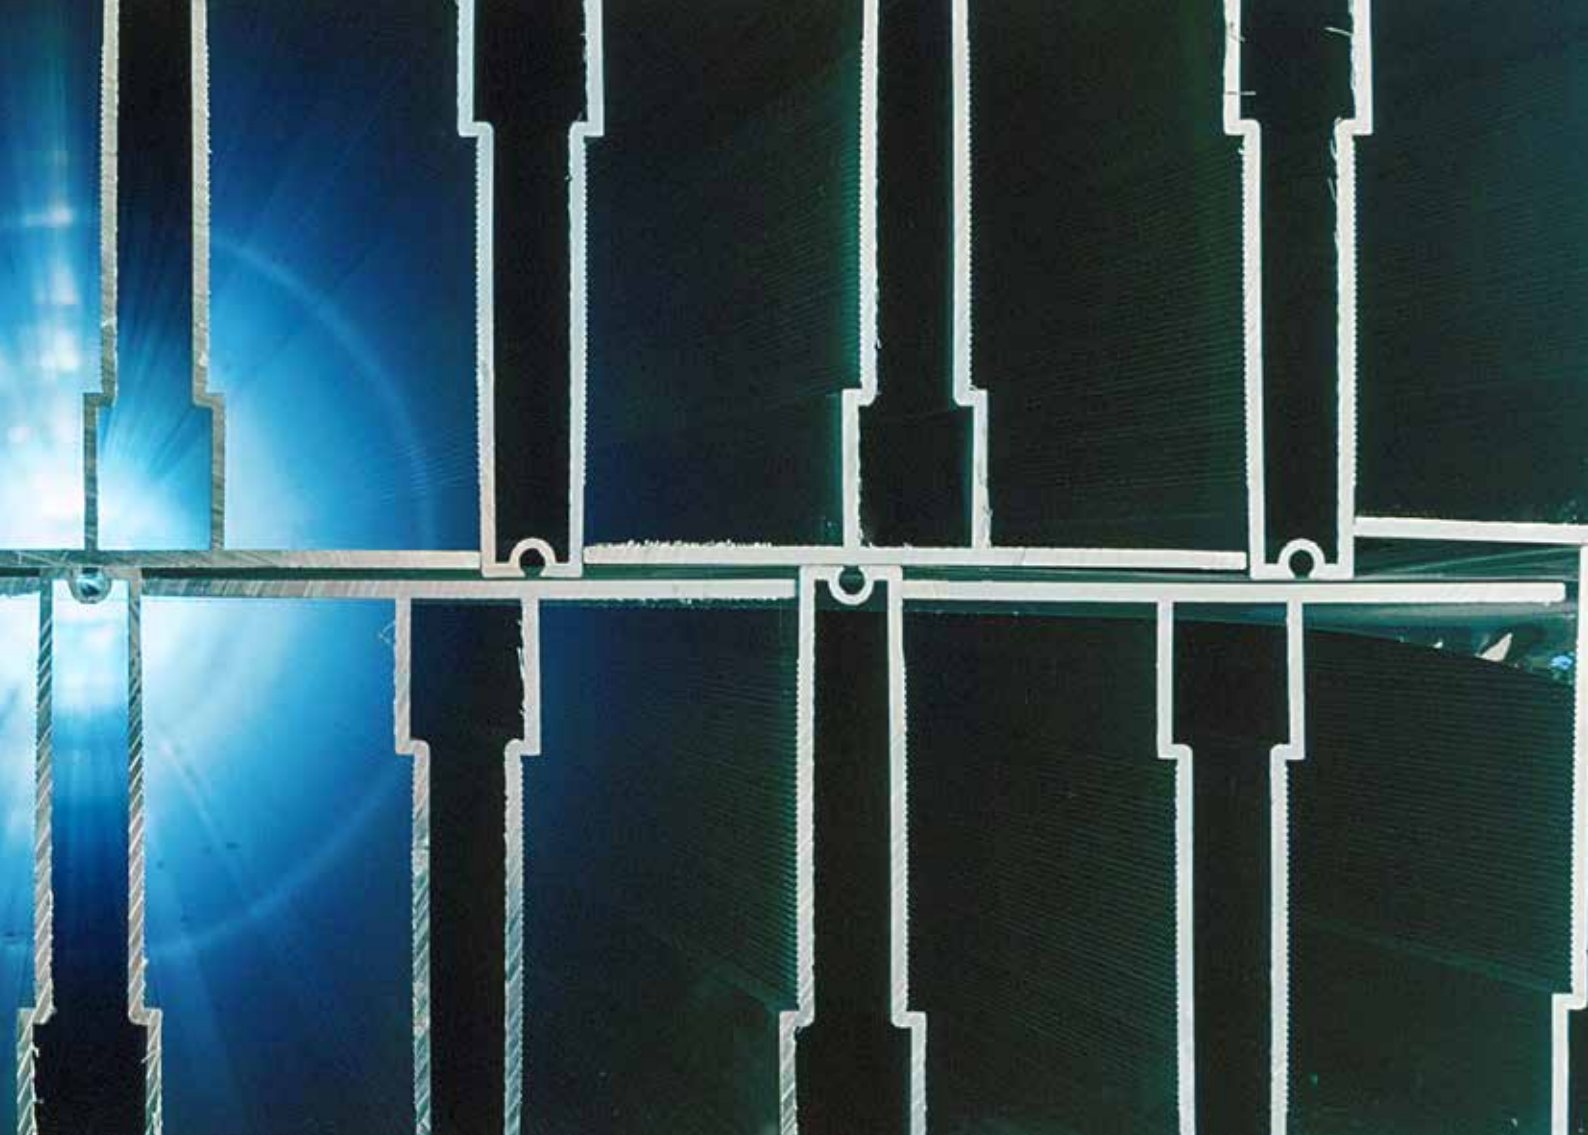

We consider diversity as an added value. For years we have been building international relations by organizing direct contacts in the countries in which we operate.

We keep our promises, because we only promise what we can guarantee. This not only with respect to the projects we undertake, but also offering services that allow trustworthiness in shipments, pre- and after sales assistance, as well as in all the steps necessary for you to get what you wish, the way you wish it.

A MADE-IN-ITALY PRODUCT

Our projects are the result of the cooperative work of all departments, from sales to production.

We invest in technology, research and human resources, in the full awareness of the need to do this for the development of the product and of Italian design.

The ability and the desire to maintain high quality standards are the goal that we set, in order always to guarantee the highest level of quality, innovation and reliability.

A constant investment in R & D, continuous improvement of the existing product lines and the constant search for new solutions allow us to meet customer needs.

HIGH PRODUCTIVE CAPACITY

Our structure and organization allow us to meet the demands of the most challenging projects: this is one of the main values distinguishing DELTA 2000.

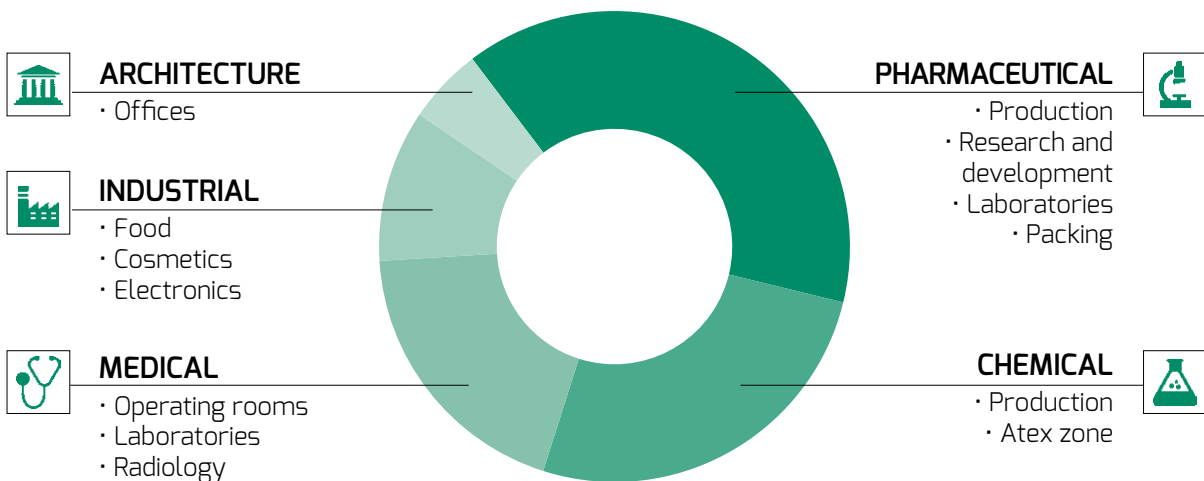

We can manufacture and install our products quickly and swift, because we know that meeting the deadlines is essential to our customers.

MADE IN ITALY

The taste for beauty and care of design, great functionality and practicality are the plus of our products: customizing solutions to suit the customer, in whatever field we operate.

UNIQUE PRODUCTS FOR SPECIALIST SECTORS

ARCHITECTURE

The architectural design consists of a logical-artistic-scientific process able to identify forms, organizations and processes that lead to the creation of dedicated spaces, in which man can accomplish specific tasks such as work, heal, relax, etc.

INDUSTRIAL

The term "Industry" is used in the broad sense to indicate any human activity that is carried out in order to generate goods or services.

MEDICAL

The operating room is a room in hospitals where surgery is practiced. This place must be built in compliance with strict rules ensuring high standards of hygiene and asepsis. In general surgical wards in hospitals have different operating rooms with attached functional rooms

(staff washing and dressing room, instrument sterilization room, storage, relaxation room, rooms for the patient's awakening).

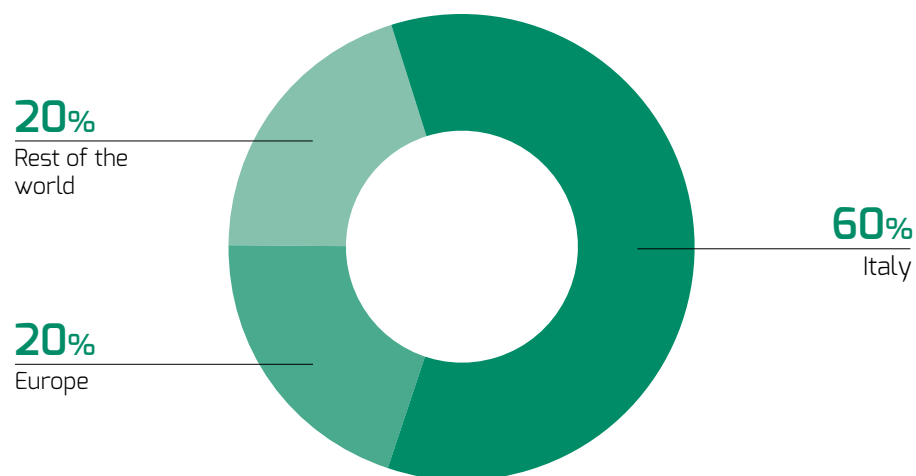

PHARMACEUTICAL

The pharmaceutical industry is the economic sector that includes research, manufacturing and marketing of drugs for human or veterinary medicine. It is one of the most profitable and economically important industries in the world.

CHEMICAL

Chemistry is the production of intermediates, raw materials, active ingredients, additives, processing aids, enzymes and catalysts for various manufacturing industries, chemical and para-chemical processing (specialty chemicals: surfactants, coatings, sweeteners, food additives, adhesives, drugs, cosmetics, etc.).

WE AIM AT GLOBAL DEVELOPMENT

Delta2000 is a company able to place its projects everywhere in the world thanks to its style, dynamism in innovation, research and development, expertise and organization for a worldwide distribution.

ITALY

On the local market, we have been distinguishing by our reliability and capacity of accomplishment, presenting us as excellent partners to all the branch-leading companies, which rely on Delta2000 for the realization of their projects.

EUROPE

At European level, we present ourselves as partners of all companies that require controlled contamination environments to protect their products.

WORLD

Thanks to our attitude for teamwork, our network allows us to search, acquire and successfully carry out projects on a global scale.

PRODUCTS THAT TURN YOUR
EXPECTATIONS INTO FACTS

MODULAR WALLS

The walls are made by joining an aluminum frame with aluminum or mono-decorated melamine laminated plastic curtain panels. Insulation is made of polystyrene, mineral wool or honey-combed aluminum.

ACCESSORIES FOR MODULAR WALLS

To complete our range of products for white-room, we design, produce and install furnishings such as cabinets, benches, material pass-through boxes, etc.

DOORS

Our doors have completely radiate frames, without sharp edges, and accept any type of accessory (internal hinges and external or internal pumps). The corner fittings between walls are produced with a system of our design that eliminates sharp edges and/or notches.

DOOR ACCESSORIES

Our doors can incorporate a wide range of accessories depending on the project needs (visible or concealed closers, handles, knobs, etc.)

SUSPENDED CEILINGS

The suspended ceiling consists of an Omega frame with 65-mm extruded anodized aluminum and/or pre-painted strips; the fill panels can be made in a variety of materials. All the materials used are certified to be Class-1 self-extinguishing.

GLASS WALLS

We have developed a completely glazed wall, which is available in two solutions: LIGHT and CLEAN. The former is composed of an aluminum structure and a safety glass (6 + 6); the latter consists of 48 mm double-glazing units, which have a coplanar finish with the other elements of the Cleanroom.

ATEX ZONE

For all environments where the explosion risk is high and should be prevented, we have a complete range of pneumatic accessories available.

PROFILES AND FINISHES

To complete our product range we can provide profiles and finishes for every need.
